API Testing Report

Tool Used

Postman

API Endpoint

https://jsonplaceholder.typicode.com/posts

Test Objectives

- Validate API responses
- Verify status codes
- Confirm data accuracy
- Perform negative testing

Test Scenarios

Test	Method	Expected
Fetch posts	GET	200 OK
Create post	POST	Data created
Delete post	DELETE	Success response
Invalid ID	GET	Error response

Validation Checks

- Status Code Validation
- Response Time Check
- JSON Structure Validation
- Header Verification

API Testing- Rohan Sindhu

Sample Result

```
Status Code: 200 OK
Response Time: 120ms
Content-Type: application/json
```

Conclusion

API behaved correctly and met expected response standards.
